

Senior Data Engineer & Data Migration Consultant with **7+ years** designing and delivering enterprise **ETL/ELT pipelines**, **SQL data-quality frameworks** and large-scale **SAP data migrations** across energy, retail, manufacturing and banking — moving millions of records into production cleanly. Expert in advanced SQL (CTEs, window functions, stored procedures, query optimisation); building self-service reporting and automated pre/post-load validation that accelerate business sign-off. Expanding into Python, dbt, Apache Airflow and AWS.

CORE SKILLS

SQL & Databases: SQL (CTEs, window functions, stored procs, query optimisation), SQL Server, PostgreSQL, Teradata, DB2, AWS Aurora/RDS	ETL & Migration: ETL/ELT, Syniti ADM/ADMM, IBM DataStage, SAP S/4HANA migration, dbt, Apache Airflow, AutoSys
SAP: LTMC, LSMW, LTMOM, IDoc, Material Master, Business Partner, Production Planning	Programming & Cloud: Python (Pandas, NumPy, SQLAlchemy, FastAPI), UNIX shell, COBOL, JCL · AWS (S3, Glue, Athena, EC2, IAM, Redshift)
Data Quality & BI: Profiling, cleansing, reconciliation, validation, governance · Tableau, self-service dashboards	AI Tooling: Claude Code, OpenAI Codex, Gemini CLI

EXPERIENCE

Senior Data Migration Consultant — Syniti BP — Energy · Jan 2025 — Aug 2026 - Led end-to-end ETL design and delivery for SAP Material Master migration (ERP → S/4HANA), 80,000+ records from transformation to production load. - Built automated pre/post-load SQL validation & reporting (record counts, quality metrics, failures), accelerating business sign-off and a controlled go-live. - Delivered self-service reports (duplicate analysis, positive list, config comparison) enabling independent business analysis. IKEA — Retail · Dec 2023 — Jan 2025 - Built and optimised stored procedures for continuous Business Partner integration — 60,000+ records across 15+ tables — improving throughput. - Implemented field-level comparison logic to classify load-ready records vs discrepancies; built the SQL layer powering load-readiness dashboards. Corning Inc. — Manufacturing · Feb 2022 — Dec 2023 - Owned end-to-end ADM development — transformation, validation and migration for Production Planning objects (BOMs, Routings, Work Centres, Batch Masters). - Built SQL data-quality reports (postcode, email, duplicate bank/SWIFT checks) and Python profiling; provided post go-live hyper-care.	Feb 2022 — Aug 2026
ETL Developer (DataStage) — Infosys Bank of America · Nov 2019 — Feb 2022 - Designed and built end-to-end IBM DataStage pipelines migrating DB2 → Teradata warehouse, ensuring integrity and performance. - Automated post-load notifications and reconciliation reports with UNIX shell; scheduled/monitored jobs with AutoSys; ran UAT and end-to-end validation.	Nov 2019 — Feb 2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner (Jul 2026)
- AWS Certified AI Practitioner (Jul 2026)
- AWS Certified Data Engineer (in progress)
- Certified Syniti ADM Developer (ID 12585089, Aug 2023)
- Advanced Data Migration / ADMM (ID 15682601, Dec 2024)
- Syniti Data Migration Methodology (Jun 2024)
- SQL (Advanced) — HackerRank (ID 9C763E8C321D, Jan 2026)

EDUCATION

B.E. — Computer Science
Visvesvaraya Technological University · Jun 2019
